The availability of a wide range of different version and options makes them suitable for almost all applications. This ranges from additional regulated speed models, receiver mounted versions including refrigerant dryer Airstation and integrated heat recovery option. The innovative integrated design, including oil separation, oil filter and thermostatic bypass valve, reduces the number of external hoses and components offering excellent reliability. The compressors are equipped with an energy saving IE 3 electric motor with reduced CO₂ emissions. As the compressors offer low noise levels they can be placed at the point of use. The Delcos Pro also has the capability to have programmable inputs and outputs, control additional equipment as well as providing the all relevant information in clear readable text. Lower energy costs can be achieved thanks to the new design of the high efficiency air end which operates at low rotational speeds. In addition, the innovative integrated design with oilseparation, oil filter and thermostatic bypass valve, increases reliability by reducing the number of external hoses and components. Low noise levels With noise levels as low as 71 dBA, you can reduce installation costs with the CompAir L22 Air Compressor by being able to locate the compressor near to personnel or equipment without health and safety issues. Reliable operation Incorporating the innovative DELCOS Pro intelligent control system ensures reliable operation and protects your investment by continuously monitoring the operational parameters. Low service costs All component parts are designed for long service and all service components are conveniently grouped behind a liftoff canopy section for short servicing times, long service intervals and reduced service costs. Variable speed option The L22 is also available in a variable speed model.
